

50 years since the Stockholm conference, numerous intertwined crises pose existential threats to the planet and its peoples. Markets, States and the UN have failed to deliver the societies we want and need. Peoples' movements in South and North are united for real alternatives.

TO WORLD LEADERS AND EVERYONE:

TACKLE

THE ROOTS CAUSES OF CLIMATE CHANGE

Rapidly phase out fossil fuel production. Stop over-consumption. Off-sets, geoengineering, hollow net-zero targets and other dangerous distractions are not solutions.

ADVANCE

VISIONS OF EQUITABLE SOCIETIES WITH WELL-BEING FOR ALL

Replace outdated growth-obsessed development models that put profit before people. Envision 100% renewable energy, food, transportation and other systems that are people-centred and environmentally sound.

UPHOLD

UNCOMPROMISABLE RIGHTS OF PEOPLE AND NATURE

Unite in intersectional struggles for intersectional justice and women's rights. Respect the Rights of Mother Earth, fight eco-fascism and make ecocide a crime.

CURB

CORPORATE CONCENTRATION OF POWER – REPLACE THE BROKEN ECONOMIC SYSTEM

Break corporate monopolies. Overhaul the global financial architecture, unfair trade rules, patent systems and market obsessions.

CUT

MILITARY SPENDING – INVEST IN SOCIAL AND CLIMATE JUSTICE

Dismantle the military-industrial complex. Build health and social protection systems that ensure healthy lives in dignity and sufficiency for everyone, everywhere.

SET

EQUITY AND JUSTICE AT THE CORE OF ALL ACTIONS

Repay climate and colonial debts. Ensure just transitions across all sectors [and fulfil past promises and commitments]. Advance genuine, participatory democracy and challenge dominance and any abuse of power.

Markets, States and the UN are not enough. Grass root movements in South and North are united.

TO WORLD LEADERS AND EVERYONE:

PHASE OUT

Fossil fuels, pollution, and extinction! **No subsidies of fossil fuels!**

INSTALL

Renewable energy, sustainable production and consumption!

Stop military spending!

DEVELOP

Technology and economy according

to human needs and within planetary boundaries! **A new balance**

between the rural and the urban!

END

Big corporation dominance! Environmental and climate injustice!

The North must pay!
